- Python, SQL, scikit-learn, Seaborn, Pandas, Numpy, Tableau, Power BI, Jupyter Notebook, Google Analytics, Google Cloud

## LANGUAGES

- English (Fluent)
- Mandarin (Fluent)
- Bahasa Malaysia (Native)

## CAREER OBJECTIVE

Innovative engineer with full-stack expertise and a track record of building products, from scalable web applications to AI chatbots. Entrepreneurial mindset with the ability to build, design, deploy, and optimise systems end-to-end. Passionate about solving problems across the stack—whether refining AI models or shipping user-centric software.

## WORK EXPERIENCE

- KitaPlan** May 2025 - Present  
Founder & AI Software Engineer
  - Founded and developed KitaPlan into a scalable, revenue-generating platform, acting as a “marketplace” for event service vendors (similar to Airbnb but without in-platform booking).
  - Built a central hub with vendor mini-websites, boosting visibility and reach through a premium subscription model.
  - Streamlined event planning by offering users a one-stop platform to discover and compare vendors without juggling multiple apps.
  - Developed an AI chatbot (e.g., for tourism) as a side project, implementing RAG models and web scraping to build knowledge bases, now moving toward commercialisation.
- Anhsin Technology Sdn Bhd** December 2024 - May 2025  
Full Stack Developer
  - Co-led development of full-scale apps, driving digital transformation for RepzYourStyle, Malaysia’s largest street festival and international dance competition. Streamlining registration, payment, high volume participants tracking and ticketing systems. Increasing client revenue by 50%+ compared to last year.
  - Built an event registration tracking system for Green Project Management (GPM) Malaysia award event, improving registration efficiency by 90% via QR scanning.
  - Strengthened client trust and optimised project delivery through direct collaboration and structured project management.
- Kiddocare Malaysia** October 2024  
Product Manager
  - Facilitated communication between technical and operations teams to align project requirements.
  - Managed tasks and timelines using ClickUp within an Agile framework.
  - Contributed to process alignment and project tracking to support operational goals.
- Independent Fund Manager** Mar 2024 - July 2024  
Automation Python Developer
  - Automated data tasks with Python, boosting workflow efficiency by 90% and streamlining ETL processes.
  - Developed Python apps for web scraping and data automation to support extraction and transformation.
  - Collaborated with clients to deliver tailored, data-driven solutions for optimized analysis.
- LuvinSecret Enterprise** Aug 2020 - Feb 2024  
Founder, CEO
  - Launched and grew a preloved fashion shop, curating high-quality, brand-new or like-new items (often from influencers) for resale.
  - Led a diverse team, managing operations, marketing, and strategic partnerships to drive business growth.
  - Built and optimized an e-commerce platform, applying data-driven marketing to boost customer engagement and retention.
  - Ensured data accuracy and operational consistency across channels to maintain strong brand trust.
